

# CAT<sup>®</sup> S61 EASY TO USE MASS SCREENING DEVICE

## 1 Open the MyFLIR app.

Mount phone into monitoring location / tripod that will allow people to pass by at a maximum of 1.5m away facing the camera as straight on as possible.

Set colour palette to 'Iron' if it is not already selected.

## 2 Tap the calibrate icon

Tap the temperature gradient icon (fourth icon in from top left) so the visible temperature bar appears to the right of the screen.

(top right icon) – the sensor will now automatically calibrate.

## 3 Tap the top temperature value to edit and lock it

Enter 34°C or 93°F and tap the tick icon to confirm.

Tap the lower temperature at the bottom of the chart to edit and lock it. Enter 32°C or 89°F and tap the tick icon to confirm.

The display will now only show temperatures between these two temperatures. Anything lower will be black, anything higher will be white. Anything showing up with a colour or white will be highlighting an elevated temperature.
